Cost Calculation

Example £277.77 per square metre
90m² x £278 = £24,999
(Just add in your square footage to Estimate the cost for your project)

We are always happy to supply a free quotation and discuss any questions you may have, please do not hesitate to contact us

To supply a quotation we will require the following:-

- Full completed Quotation Form on our "Packages" Page
- Full set of Plans and elevations (If you have any other drawings available such as sections, etc these would be useful.

Depending on the complexity of the building quotations are usually issued within 7 days

*PLEASE NOTE: The above prices are intended as a guide to a budget cost of a RapidBuild Package. The rates have been established by average square footage costs on previous projects. Bespoke designs will vary in price.
